

Getting ready for template day

On template day we measure your cabinets with a 3D laser to create an exact digital template. A smooth visit keeps your install on schedule, typically within 7 days of templating.

BEFORE WE ARRIVE

- ☐ Base cabinets fully installed, level and secured
We template the cabinets as they are, so they must be final.
- ☐ Sink and faucet on site, or spec sheets sent to us
Undermount sinks are needed to cut the opening exactly.
- ☐ Cooktop or range on site, or model numbers ready
- ☐ Other appliances that affect the stone: dishwasher, slide-in range, built-ins
- ☐ Old countertops removed, or tear-out booked with us
For an added fee, we tear out your old tops on install day.
- ☐ Plumber scheduled to disconnect and reconnect the sink
For liability reasons we do not handle plumbing.
- ☐ Clear countertops, cabinet tops and a path to the kitchen
- ☐ Someone 18+ on site who can approve seams, overhangs and edges

DECISIONS TO MAKE

- ☐ Edge profile chosen
- ☐ Overhang depth for seating
- ☐ Backsplash: 4-inch, full height or none
- ☐ Faucet and soap dispenser hole locations
- ☐ Waterfall or mitered ends, if any

NOTES FOR OUR TEMPLATER

Next

After templating, for an added fee we can lay your template over a scan of your actual slab, so you can see where seams and veining fall before we cut. Your install date is confirmed at the template appointment.
